Timeline of the First 69 of the 70 Weeks of Daniel 9

Based on Harold Hoehner "Chronological Aspects of the Life of Christ"

69 weeks x 7 = 483 years

One prophetic week is seven years

483 prophetic **lunar** years

x 360 days per **lunar** year

173,880 days

173,880.000

÷ 365.242 days per **solar** year

476.068 solar years

0.068 **solar** years

x 365.242 days per **solar** year

25 days

March 5 of 444 BC to March 30 of 33 AD

= **476 solar years and 25 days**
